What else is going on?

- Iran
 - Tensions seem to be easing
 - Oil sliding for now, could go back up if there are actual supply constraints
 - Curious to see what happens in Iraq... Sanctions there could constrain supply
- Trade: Phase one deal *should* be signed next week
 - We still don't know what is in it, but tariff relief helps
 - Phase two logically comes next, but big questions remain about if it will move the ball forward
- Federal Reserve/Interest rates
 - Powell seems to be pretty happy to sit on his hands until the data makes him do something.
- Economic data is relatively stable. Consumer is still the strength of the economy
- Brexit: Something is happening at the end of this month
 - Probably not a hard Brexit at that point though
